

ABSTRACT

G-IB-177

MASON-DIXON LINE: MILESTONE NO. ---(179)

1767 (mound), 1902 (monument)

Finzel, Maryland vicinity

Public/private

Milestone No. ---(179) and its ^{small} mound of earth and stones on Big Savage Mountain ridge mark Mason and Dixon's ^{easternmost mile mound and} approximate 166th mile from the northeast corner of Maryland, the beginning of their 230.228-mile West Line, the provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The monument is a very plain, dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland. It is in very good condition, unaltered, firmly set in the center of the mound; measures about 10 inches square by about 17 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when the area was surveyed and cairn erected), and 1902 on the west side (when the ^{new} monument was set). The mound was originally a wood post marked W on the west side with earth heaped around it, and now ^{is covered with stones in good condition} measuring about 6 feet in diameter by about 2 feet high at the center, with the monument substituting for the wood post, long since gone. On the national and state levels, this monument and mound are significant primarily as among the thematic group series of some 248 markers still visually defining the West Line. Locally, as among the 42 markers along the present Garrett/Somerset-Fayette county boundary, they are also significant symbolically for their relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. --- (179) and its mound on ^{the western edge of} Big Savage Mountain ridge mark Mason and Dixon's 168th mile and 76 chains "from the Post Marked West in Mr. Bryan's Field" or 165.959 miles from the northeast corner of Maryland, the beginning of their West Line. The monument was new when set into the center of the mound in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is a very plain, dressed Cockeysville marble post with a low pyramidal top; is in very good condition, firmly set, unaltered; measures 10 inches square by about 17 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year ¹⁷⁶⁷ when this area was surveyed and mound erected on the east side, and 1902 on the west side (when monument first set). The mound, described by the Resurvey (MGS, Vol. 7, p. 96) as ^{a "mound of earth" and} "the most eastern of these mile mounds," is now a small mound of earth ^{covered with} stones, and marks Mason and Dixon's approximate 166th mile; is in good condition; is only about 6 feet in diameter by about 2 feet high, and may have been altered by the addition of stones at the time of monumentation.

The area here is the remote, very rough, stony, windswept, ^{densely} forested ridge of Big Savage Mountain (elevation at the site about 2880 feet). The site is within Election District 13 of ALLEGANY COUNTY, MD, and ^{marks} the Southern corner of Southampton and Greenville Townships of Somerset County, PA; about 1 1/4 miles northeast of the village of Finzel, MD; about 2 1/2 miles southeast of the settlement of Pocahontas, PA; about 250 feet west of the preceding marker, (No. --- (178); about 2650 feet east of No. --- (180); in a young deciduous thicket about 240 feet south of the old pipeline. It cannot be seen from any road, and ^{is} difficult to spot from the pipeline. This remoteness and obscurity seem protective of both monument and mound.

The monument, as with the 1902 monuments set west of Sideling Hill by the Resurvey, was quarried and carved in Cockeysville, MD, originally measured about 10 inches square by about 4 1/2 feet long, cut to stand about 1 1/2 feet high with the remaining 3 feet for setting into the ground or mound. The letters and numbers are blocky, without serifs, V-sunk, and horizontally aligned as a band near the top. These ^{and the top planes and apex} are clear and intact, as is the entire stone except for a large chip out of the top southwest corner and chips along the southeast and southwest vertical edges.

STATEMENT OF SIGNIFICANCE

Milestone No. ---(179) and its mound are significant on the national and state levels primarily as among the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile^{provincial} boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This part of the Line was surveyed in 1767; the site marked with a cairn November 11th, 1767; and a new Cockeysville marble monument set in the remains of the cairn in 1902, during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of 42 markers along the present Garrett/Somerset-Fayette county boundary, ^{and its mound} No. ---(179) are also significant for their identifiable relationship to the colonial and Civil War heritage of these counties.
